

FAUZAN RAHADIAN FARIS

NETWORK ENGINEER

0822-9791-5767 | fauzanrfaris245@gmail.com | portofolio-fauzanrf.vercel.app

Support Engineer with 4+ years of experience in network operations, infrastructure deployment, technical support, and enterprise project implementation. Skilled in network monitoring, incident handling, troubleshooting, SD-WAN, VPN, server deployment, and customer support operations. Experienced in managing enterprise infrastructure projects, technical documentation, ticketing systems, and service restoration activities while ensuring SLA compliance. Familiar with monitoring tools such as Grafana and Zabbix, with hands-on experience supporting enterprise environments across networking, server infrastructure, and cybersecurity initiatives.

AREA OF EXPERTISE

Network Monitoring & Troubleshooting • Network Operations • Infrastructure Support • Server Deployment • Technical Support & Incident Management • SD-WAN & VPN Solutions • SQL • On-site Implementation

PROFESSIONAL EXPERIENCE

PT InternetWork Komunikasi Indonesia

Network Engineer Support | Dec 2025 - Present

- Monitored network performance and service availability using Zabbix and Grafana to ensure stable customer connectivity and SLA compliance.
- Troubleshot enterprise internet, SD-WAN, and VPN connectivity issues.
- Provided frontline technical support for network incidents, service requests, and onsite implementation activities.
- Deployed and configured customer network infrastructure including routers, firewalls, switches, access points, and wireless radio devices using MikroTik, Fortigate, Peplink, Starlink, Ruijie, and Ubiquiti solutions.
- Managed support tickets, documented incidents, escalated critical issues, and coordinated resolution to meet SLA response and resolution targets.

PT Nusalogi Integrasi Sistem

Technical Support Leader | Jul 2021 - Dec 2025

- Lead technical project planning and implementation for infrastructure, server, and CCTV.
- Prepared project documentation including quotation, technical scope, implementation records, and BAST handover documents.
- Supported on site technical implementation, device installation, and basic configuration activities.
- Assisted project teams in preparing infrastructure environments for customer acceptance and operational use.
- Supervised installation and configuration of server, CCTV, and access control infrastructure for enterprise clients.

TECHNICAL SKILLS

Networking: MikroTik, Fortigate, Peplink, Starlink, SD-WAN, VPN, CPE, VLAN, Routing, Network Monitoring

Infrastructure: Server Installation, Rack Mounting, Network Cabling, CCTV, Access Door System

Cloud & Security: Microsoft Office 365, AWS Cloud Foundation, Huawei HCIA Cyber Security, EDR/XDR Support

Tools: Zabbix, Grafana, Ticketing System

Programming: PHP, TypeScript, Java, JavaScript, MySQL

PROJECT EXPERIENCE

PT Astra Asmo3 Group

- Supported EDR/XDR rollout across 1,500+ enterprise endpoints.
- Assisted Windows obsolete replacement and Office 365 migration.
- Performed endpoint troubleshooting, scanning, and ransomware incident support.

PT Huawei Cloud Indonesia

- Supported enterprise server deployment including hardware installation and rack preparation.
- Installed and organized network cabling for data center/server connectivity.

PT xFusion Indonesia

- Deployed and configured enterprise servers including rack mounting, OS installation, and server hardening.
- Prepared low-level design documentation and supported implementation handover.

EDUCATION

SMK Karya Bahana Mandiri 1

2014 - 2017

Teknik Komputer & Jaringan

ADDITIONAL INFORMATION

- **Languages:** Indonesia, English.
- **Certifications:** MTCNA, BNSP Cloud Computing, BNSP Junior Networking, BNSP Web Programming
- **Badge :** AWS Academy Cloud Foundation, HCIA Academy Cyber Security, FCIA Server xFusion
